

# ▲ RAZOR TRACKING

## Pro Tracker Device Wired Installation

### 1. Getting Started

- Most wiring installations are connected under the dash, console, or fuse box.

### 2. Wired Installation

- Take the end with open wires and splice them as follows:
  - Red Wire — 12V Constant Power
  - Blue Wire — 12V Ignition Switch
  - Black Wire — Chassis Ground

### 3. Wire Management

- Run the wires to the preferred storage location, directly under or behind the vehicle's dashboard
- Secure the cables to ensure safe vehicle and device operation

## 4. Device Installation

- For optimal device performance, an unobstructed view of the sky is preferred
- Device storage options:
  - Tucked inside of the vehicle's dashboard
  - Mounted or taped to the inside of the windshield with double-sided tape

## 6. Verify Device Installation

- Wait for the 2 LEDs to start a single blink sequence on the Pro Hardwire Tracker Device
  - Blue LED — Cellular service
  - Red LED — GPS service

## 7. Look — You're On The Map!

- Log-in to [RazorTracking.net](https://RazorTracking.net) or open your app and start tracking!

## Questions & Troubleshooting

- Call (833) GORAZOR, and select option 2, or visit our Help Center by clicking the  icon in the right panel once logged into Razor Tracking
