Device Actions	Magnet Hold	LED Flash Pattern
Check Status	~ 1 Sec	2 Blue = On 2 Red = Off
Turn On	> 3 Sec	3 Red (Last blink is solid until manget is removed) 1 Blue = Unit is ready
Turn Off	> 3 Sec	2 Blue 15 Red = Off

*Solar Hybrid devices are shipped activated
**Magnetic cradle included, use magnet for magnet actions

1. Getting Started

- The Solar Hybrid device is IP67 rated, can be mounted exteriorly or interiorly. The magnetic mount allows it to be mounted without hardware on magnetic surfaces.

2. Non–Wired & Wired Installation

- Non-Wired Installation
  - Device will report at set intervals when moving
- Wired Installation (Recommended)
  - Device will report every 30 seconds when moving
  - Red Wire — 12V Power
  - Black Wire — Chassis Ground
  - Yellow Wire — Not Used

3. Battery Performance

- The battery is fully recharged after 8-12 hour with applied power
- The solar panel supports a continuous charge with a few hours of sunlight per day*

  *May vary dependent on the users geographic location

4. Wire Management

- Run the device plug to your preferred storage location
  - Secure the cables to ensure safe asset and device operation

5. Device Installation

- Align the device plug and insert it into the Solar Hybrid device
- when the wire harness is firmly in place, screw the collar down firmly
- Do not push the attachment in at an angle or use too much force

6. Verify Device Installation

- Single Blue LED — Cellular service
- Single Green LED — GPS service
- Solid Red LED — Charging

7. Look — You're On The Map!
